SUBJECT: Part 261 - Identification & Listing of Hazardous Waste

Dear Mr. Cavagnero:

In accordance with our agreement, I am confirming the information I gave you by phone July 15, 1980.

Eaton Corporation's New Haven Plant generates less than 1000 kg of hazardous waste per month as a product of a plating rinse water treatment system. The system is operated under an NPDES permit DEP/WPC-093-126. The plating waste is transported by an Eaton owned truck to Environmental Waste (Waterbury, Connecticut), a licensed waste disposal firm. All waste is properly identified for transportation in 55-gallon drums. Records indicate that Eaton (New Haven) is producing approximately one 55-gallon drum per week.

Under the provisions of Paragraph 261.5, the waste generated by EATON/New Haven is exempt from the permit and transportation requirements listed in Part 261; however, records of all shipments are kept, containers are marked properly, and all wastes are delivered directly to the final disposal firm.

Thank you for your assistance. If you have any questions regarding our position please call me.

Sincerely yours,

William J. Fitzgerald
